

**Mini**

**Single / Small**

**Double / Large**

The 'Virtual' make Stevenson Screen, manufactured as per IS: 5948:1970, are standard shelter (from rain, snow and high winds, but also leaves and animals) for meteorological instruments, particularly Max., Min., wet and dry bulb thermometers used to record humidity and air temperature.

It is kept 1.2m above the ground by legs / Concrete Pillars to avoid strong temperature gradients at ground level, has louvred sides to encourage the free passage of air, and is painted white to reflect heat radiation, since what is measured is the temperature of the air in the shade, not of the sunshine.

Walls and floor of white-painted wood provide screening, and extensive louvres maintain adequate ventilation on all but the stillest days.

A screen is designed to provide an enclosure with a uniform temperature the same as that of outside air. It is completely surround the thermometers and exclude radiant heat and precipitation. The walls of such a screen should preferably be double-louvered and the floor is made of staggered boards. For Small & Large Stevenson Screen the roof is double-layered, with provision for ventilation of the space between the two layers.

**Three types of screens are available**

**Mini** –for Two vertical type meteorological thermometers  
 Dimensions: Mini screen  
 Width : 230 mm  
 Depth:130 mm  
 Height : 340 mm

**Single / Small** – for four meteorological thermometers  
 Dimensions: Small screen  
 Width (Between inner slots of louvers): 560 mm  
 Depth (Between inner slots of louvers): 315 mm  
 Height (Between middle of lower roof and floor): 412 mm

**Double / Large** – for thermograph and hygrograph  
 Dimensions: Large screen  
 Width (Between inner slots of louvers): 1325 mm  
 Depth (Between inner slots of louvers): 315 mm  
 Height (Between middle of lower roof and floor): 412 mm

**Optional Accessories : Mounting Stand** (to be purchased Separately)  
 for Small & Large Stevenson Screen  
 Height: 1.2 meter above Ground Level  
 Material: Mild Steel Angle with corrosion resistant Black Paint.
